Professional Experience

Jan 2022 — present: **Independent Software Consultant & Engineering Lead**

Working with financial technology companies on architecture, engineering leadership, and complex software delivery, combining hands-on technical expertise with stakeholder engagement and team leadership.

Jan 2022 — now: **Head of R&D** at Titan-T (FX technology provider)

- Building a Forex trading platform from scratch, 2M+ users.
- Leading a distributed team of 8 engineers, including developers and DevOps.
- Technical decision-making and stakeholder collaboration to define project scope and deliverables.
- Designing and documenting high-level project architecture (C4 diagrams, ADRs).
- Hiring, mentoring and coaching team members, facilitating professional growth and development, performance evaluations.
- Defining technical standards and best practices.

Nov 2021 — now: **Software architect** at T-Teck (fintech technology provider)

- Building and maintaining several regulated fintech products (e-wallet, crypto exchange) with strong uptime requirements.
- Technical decision-making and stakeholder collaboration to define project scope and deliverables.

June 2020 — Jan 2022: **Principal engineer** at PacelyFitnes

Architected and developed scalable online fitness platform/marketplace, designing both frontend and backend systems.

Jan 2019 — June 2021: **Senior software engineer** at eToro (social trading company)

Development of a low latency HFT cryptocurrency exchange and complementary products. Software design and implementation, testing, documenting, mentoring.

Earlier experience

2014 — 2019 — Full-stack software engineering roles at WhiteByte, Intex LTD, and Ecomleader Ltd., delivering web applications, e-commerce platforms, internal tools, and client solutions.

Architecture & Design Expertise

- Microservices architecture, distributed systems design
- High-load system optimization and scaling strategies
- API design and integration patterns
- Database architecture and performance optimization
- Performance monitoring and observability
- Cloud architecture (Azure, GCP, AWS)
- Security architecture for financial systems
- FIX protocol

- MetaTrader 4/5
